FRAMEWORK AWARD: GLASGOW CITY COUNCIL PUBLIC REALM AVENUES PROJECT

Civil Engineering Division are delighted to have been appointed as a Framework Contractor for all 3 lots of Glasgow City Councils Public Realm Avenues Project.

This framework will be in place for three years with an option for a one-year extension, with 16 projects due for completion by 2025.

The works will involve the construction of high-quality public realms where the existing Avenue space will reallocate to create connected green routes across the city centre where continuous footways, green spaces, and sustainable drainage solutions are the key outcome.

The main public realm works within the framework scope include the installation of high-quality natural stone surfaces, street furniture, and decorative items along with extensive blue infrastructure including rain gardens, planting beds, and soft landscaping features such as raised beds and semi-mature trees. To facilitate this, carriageway space is to be reallocated to promote the use of sustainable transport modes.

This is an exciting opportunity for the Company, with individual mini-tenders for the first tranche of Avenues due to be issued towards the end of the year.
