Civil Engineering Division is pleased to announce that we have been successful in our tender to be appointed to the North East Lincolnshire Council Highways Framework.

This appointment is for a four year term. The annual expenditure between 7 appointed contractors is £25million with 12 contracts on average being let each year valued from £1m to OJEU threshold.

The scope of this Framework Agreement is to provide a mechanism for works to be procured, designed to encourage the Parties to work with each other, with all other project participants in an open, co-operative and collaborative manner and in a spirit of mutual trust and respect, with a view to achieving the Framework Objectives.

Works will include the undertaking of major highways maintenance and improvements. To include major carriageway reconstruction, reconstruction of footways, kerbing, drainage, bus stop improvements, traffic calming schemes, provision of cycle routes, civils works in connection with traffic signal and controlled crossing improvements.

IHB will now be invited to bid for each project that is let and the criteria for award is 100% on price.

The first tender will be issued on 27th March 2018 and is for the replacement of a Tollbar Roundabout with a Signalised Junction.
