SCHOOL LIAISON IN WARRINGTON

I & H Brown is currently delivering the Omega South R2 Infrastructure works in North Warrington for new client Omega Warrington Limited.

From the outset of the project a key constraint highlighted was the proximity of Barrowhill Primary School to the site. Following engagement with the School’s Headmaster, Duncan Brown and Hannah Bradshaw from our team visited the school and spoke with the 560 school pupils, aged between 4 and 11, at their Monday morning assembly.

Duncan and Hannah gave pupils and staff a brief introduction to I & H Brown, the history of the site and an explanation of the works, before discussing the safety hazards that the children need to be aware of. To help to educate the pupils on the dangers associated with the construction site, 2 volunteer pupils dressed up in PPE to show the H&S measures taken on site.

As a favour to the school, a second and more light-hearted school visit was arranged in which one of I & H Brown’s site staff performed the critical role of playing Santa at the primary school’s Christmas Day in the lead up to the festive break!
