Many congratulations to Steven Mailer, who has recently been promoted to Quantity Surveyor in our Civil Engineering Division. Steven joined the company in 2008 as a school leaver. After studying on a day-release basis at Glasgow Caledonian University whilst working full time, he graduated with an Honours degree in July 2013. In the past 9 years, he has created an extensive bank of knowledge and experience through working on a variety of civil engineering, infrastructure and energy projects. He has worked with various forms of contract and methods of measurement in projects with a total value of around £50 million.

Steven commented: “When I chose this field of work, Quantity Surveying was portrayed to me as a profession loaded with variety, creativity, challenges and opportunity. Throughout my early and developing career, I have not been disappointed. The knowledge and training provided by I & H Brown has been invaluable and has allowed me to develop and gain great experience in the main roles, duties and competences of a Quantity Surveyor.

I am excited about my future here. I am looking to expand my portfolio and my expertise and to become more comprehensive in my role. The next step in my career will also involve achieving membership of the Chartered Institution of Civil Engineering Surveyors.”
