

CRIEFF ROAD / TULLOCH ROAD, PERTH	
Description:	Site enabling works including soil nailing and bulk earthworks
Form of Contract:	ICE 6 th Edition
Duration:	24 weeks
Contract Value:	£900,000
Joint Clients:	Barratt Construction and Private Pension Yeoman McAllister & Hornbuckle Mitchell Trustees
Clients Representative:	Harley Haddow Partnership

This interesting project was for the preparation of a challenging site for new housing.

The site occupies a triangular parcel of land between Crieff and Tulloch Roads in Perth, with a level difference in excess of 10 metres between the upper and lower sections of the area. The purpose of the project was to create a developable area at the lower level, by carrying out bulk earthworks in conjunction with the installation of a new soil nailed wall to retain and stabilize the embankment between the levels.

The project also involved the removal of an area of Japanese Knotweed.

Close co-operation was required with the operators of the plant yard that occupied the whole of the upper level of the site.
