

CONTRACT AWARD – OMEGA SOUTH R2 INFRASTRUCTURE WORKS

Civil Engineering Division is delighted to report that we have been awarded Omega South R2 Infrastructure works at Lingley Green close to Warrington Cheshire.

This is our first project for OWL (Omega Warrington Ltd) and forms part of on growing developments within the area to provide further housing, schools and businesses etc.

Works will begin in October 2016 with a construction period of 18 weeks.

The works include site clearance, foul and surface water drainage, construction of a new surfaced access road link between two roundabouts, pathways, associated signs and lighting, landscaping, 2nr attenuation ponds, gabion works, statutory services, environmental and geotechnical works.

The Client has designated the area known as the Green Heart to allow earthworks to be deposited, which is located to the north east of the site and will require a temporary haul road to be installed to enable access.

From an environmental aspect it has been highlighted that the habitat is typical for newt habitation and a newt tunnel is to be installed as part of the works.

The project will run through to March 2017 and is a Design & Construct in accordance with NEC option A.

OWL have installed WSP as their onsite representative. WSP are also taking on design.
